## LEGISLATIVE UPDATE

2018 General Legislative Session

Issue #4

February 19, 2018

---

### Welcome to the 2018 Legislative Update

This issue includes highlights of week four, what we can expect in the week ahead, and information for protecting wildlife and the environment. Please direct any questions or comments to Steve Erickson: [erickson.steve1@comcast.net](mailto:erickson.steve1@comcast.net).

### About the Legislative Update

The Legislative Update is made possible by the **Utah Audubon Council** and contributing organizations. Each Update provides bill and budget item descriptions and status updates throughout the Session, as well as important Session dates and key committees. For the most up-to-date information and the names and contact information for all legislators, check the Legislature's website at [www.le.utah.gov](http://www.le.utah.gov). The Legislative Update focuses on legislative information pertaining to wildlife, sensitive and invasive species, public lands, state parks, SITLA land management, energy development, renewable energy and conservation, and water issues. The Update will be distributed after each Friday of the Session. We may also send out additional Action Alerts during the Session as issues arise that need quick action. We hope each Update

issue will prepare you to call, email or tweet your legislators with your opinions and concerns!

### ACTION ALERT!

The House will vote early this week (probably Tuesday) on HB 136, Rep. Mike Noel's attempt to intimidate government entities and employees and to chill free speech contrary to positions taken by the Legislature on public lands. Urge your Representative (and Senator) to vote NO! on this bill!

## **News of the Fourth Week (Week # 4)**

HCR 1, acknowledging global warming, failed in House NRAE Standing Committee, but the less threatening HCR 7, which recognizes the impacts of climate change on Utah, passed that same committee and - for the first time – the issue will be debated on the House floor.

Advocates are hopeful that we've seen the last of the efforts this year to strip from Salt Lake and Sandy Cities extra-territorial jurisdiction over the watersheds of the Cottonwood Canyons. A watered-down 2<sup>nd</sup> Sub HR 135 - which would have created a state tax on water rates to fund infrastructure (including the Lake Powell pipeline and Bear River development projects) – was held by House NRAE with a unanimous vote. It's likely these "ET" issues will be reviewed during Interim Study.

The Energy Solutions tax break bill (HB 169) is on the Senate calendar awaiting action while a number of good renewable energy (HB 261, SB 141) and air quality bills (HB 101, HB 171, HB 211) are progressing.

There is still no bill that addresses plans for an inland port in Salt Lake City's Northwest Quadrant. We can report that the City has forwarded to legislative leaders its proposal for a shared, collaborative governance structure for the Global Trade Port which preserves the City's zoning authority. And we have been assured that Mayor Biskupski has taken a hard stance against any moves to eliminate or reduce the natural areas in the NWQ.

## **Budget News**

Contrary to past years, mid-February budget projections were not released last week, so expectations are we will see the budget numbers this week. However, no Executive Appropriations Committee meetings are scheduled, so it appears the budget suspense will build for another week.

Our request for a staff position for the GSL Salinity Advisory Council (\$50,000) is still in play, as is \$100,000 to FFSL for a Rivers Analyst but it's less likely we will find funding for GSL Research this Session. Many worthwhile programs are in direct competition with requests to fund lawsuits and other questionable programs prioritized by the Sage Brush Rebellion caucus (see Issue #3). Funding for phragmites removal (\$500,000) seems assured, while \$500,000 one-time for the Le Ray McAllister critical lands preservation fund is uncertain.

Please contact legislators to encourage their support of smart management and protection and restoration of habitats, not more anti-federal political posturing and losing lawsuits.

## **What's Ahead**

As we've passed the mid-point in the Session, the number of Standing Committee meetings will decrease as the hours of floor time increase. (By rule, a bill must be heard in at least one Standing Committee in order to be enacted.) Standing Committees will hear and vote on bills from 8:00-10:00 each day this week and from 2:00-4:00 T-W. Floor time will be from 11:00 to 12:15 and from 2:00 to 4:00 each day.
